## Dillon Hopley

### Area of Expertise

As senior associate with Colliers, Dillon Hopley specializes in the sale and leasing of commercial properties, focusing on office, industrial, land and investments. He partners with Greg Hopley in the Scottsdale office.

The team's services include landlord and tenant representation, 1031 exchanges, sale/leasebacks, build-to-suits, land acquisition and development, office and industrial condos, aviation hangar sales and leasing, commercial property sales and leasing, and effective and targeted property marketing. Their geographic focus covers metro Phoenix and markets across the U.S.

Dillon represents his clients' best interests with the highest degree of professionalism to deliver results that meet their financial goals. Serving as their advocate, he carefully guides clients throughout the entire process of leasing, sales, and acquisitions to achieve the best terms possible.

Through detailed research and analysis of current market conditions and trends, Dillon assists clients in making strategic real estate decisions that align with their business objectives.

Dillon is highly responsive, keeps clients fully informed, provides honest and constructive feedback, and values client satisfaction above all else. Clients and peers consider Dillon to be an asset, with traits that include a drive for success, loyalty, honesty, a diligent work ethic and strong leadership qualities

### Business Background

Dillon joined Colliers in Arizona as a research associate. In this role, he assisted the research director in producing quarterly research reports for the Arizona market for each property discipline, including office, medical, retail, industrial, multifamily, land and investments.

Dillon provided in-depth market analysis, prepared demographic surveys, tracked market activity and compiled statistics in support of sales and marketing efforts.

He is well-versed in the use of Nexis, CoStar, MagnifyMaps, Hydra and REscour to produce deep dive extractions of substantive commercial real estate data.
